Play your favorite DJ Azwell album with the new soundtrack by the leader of this genre: Azwell himself! DJ Azz is a techno DJ from Detroit, USA and founder of the techno movement. He produced music before the term was even invented. Almost a decade before the term was even invented, his creations were responsible for the smashing success of Chicago's movement. Born and raised in the highly dangerous and crime-ridden northern burbs of Detroit, there was no way he was going to stand by idly while his hometown burned. He had to do something. He had to fight back. He had to take care of his people. He had to end the reign of darkness. He had to carry on the flame. To stand up for those who could not. To bring light to the millions who were afraid. He had to transform Detroit from the mean streets to the energy-packed plains. He knew that the only way to save the city was to save the city first. His first step was to assemble a team of young revolutionary DJs called The Crew. And when it came time to record and release, it was his mission to recruit Detroit's finest DJs to help deliver his message. Together, they would pave the path to the future of techno. Together, they would change the world. As an extra bonus, you get the new soundtrack for DJ Azwell by the leader of this genre: Azwell himself!
