Revit 2010 followed, which was a complete redesign of the Revit interface. In 2007, Autodesk released Revit Architecture, which was intended to be the design element-focused product, and in the next year, Revit MEP, which brought Autodesk's MEP technology to Revit. In 2011, the first release of AutoCAD Architecture was made, with many changes from the previous year. In 2012, Autodesk released a new interface, "dynamic block".
