Add new car magazine for  
eSteer 2004.Q: Data  
structure for Reducing and  
counting I have a big data  
set (about 1 million  
records), which I need to  
display it based on 2  
columns. However, some of  
the rows might have a

---

duplicate number and I need to display the row that has less records. In addition, I also want to count the occurrence of the same number over the rows in a column. Is there any efficient way of doing this?

A: This is a job for a group by clause with a having clause: `select t.col1, t.col2, count(*) as numrows from (select t.*, count(*) as numrows from c6a93da74d`
